EDUCATION

The Iron Yard Academy Rails Engineering Student

September 2014 - December 2014

- Attended intensive code school requiring 60+ hours per week of instruction and project-based learning
- Developed and shipped Rails applications on a daily and weekly basis

Fuller Theological Seminary Master of Arts, Cross-cultural Studies

March 2006

- Degree training in cross-cultural team development and leadership.
- Regularly worked on projects with team members from multiple countries and continents

Louisiana State University Bachelor of Arts, History

May 1999

PROFESSIONAL EXPERIENCE

United Networks of America

February 2017 - Present

- As a Software Developer for United Networks of America I work primarily with Ruby on Rails and JavaScript, building, updating and debugging apps as well as updating some PHP apps, primarily working on their HTML/JavaScript and creating components to be used as iFrames for those sites.
- We work to provide pharmaceutical discounts for prescription drugs and integrate pharmacy/drug information from several sources.

Real Property Management Baton Rouge

October 2015 - February 2017

- As a Project Manager over our maintenance coordination, created new workflows as we grew from managing 75 properties to 250. Oversaw/coordinated work for five maintenance professionals and one maintenance company. Processed just under a thousand maintenance requests for 2016

Freelance Web/IT

February 2015 - Present

- Worked with a social media company to build mobile-first websites, both standard HTML/CSS and WordPress. Worked as consultant to Real Property Management as IT consultant, moving their workflows to Google Apps, leading to full-time employment. Worked with counseling group to update their site and give options for new WP theme integration.
